CORPORATE COMPLIANCE

THE KNOWLEDGE OF OUR VALUES

Crucial to the success of the TROX GROUP is a fair and proper dealing with our customers, our suppliers and other business partners in accordance with laws and ethical principles.

To avoid liability risks in the national and international environment, a Compliance Management System (CMS) was introduced by the management and the supervisory board. TROX Corporate Compliance is responsible for the global implementation of the system. Offences are largely avoided through the regulation of benefits and donations, business partner assessments as well as regular trainings and audits on site.

The underlying message is: We resign business that would only be generated under the violation of laws or our regulations.
